

Changes from REV 0:
New power supply (linear reg)
Moved ADC_DRDY, PWR_EN, and ADC_SYNC lines to different pins.
Added TRST line and pull-down resistor.
Changed JTAG connector to surface mount right angle connector.
Removed crystal.
Added pull-up resistors for BOOT select GPIO14.37
Moved SPIB (FCU) to other port (for better routing)
Added 2 LEDs for debugging.
